■ Business & Marketing

You are a senior conversion copywriter. Write a landing page hero section for [PRODUCT] targeting [AUDIENCE]. Include: headline, subheadline, 3 benefit bullets, CTA. Make it benefit-driven, not feature-driven. Use AIDA framework.

Write a 1500-word blog post about [TOPIC]. Target keyword: [KEYWORD]. Include: compelling intro with hook, H2 subheadings, bullet points, FAQ section, conclusion with CTA. Tone: professional.

Create a 5-email welcome sequence for [PRODUCT]. Email structure: 1) Welcome + value, 2) Problem agitation, 3) Solution showcase, 4) Social proof, 5) Final CTA. Subject lines included. Friendly, personal tone.

Analyze [COMPETITOR]'s marketing strategy. Examine: target audience, unique selling points, content strategy, social media presence, pricing model, customer reviews. Provide actionable insights on their weaknesses we can exploit.

Create a 30-day social media content calendar for [BRAND] on [PLATFORM]. Include: post type (educational/entertaining/promotional), topic, hook, CTA. Mix ratio: 60% value, 25% engagement, 15% promotional.

Write a cold email to [TARGET ROLE] at [COMPANY TYPE]. Subject line must be under 50 chars. Body: personalized opener, specific value proposition, social proof, soft CTA. No fluff. Under 150 words.

Write an Amazon/Etsy product description for [PRODUCT]. Include: emotional hook, 5 key benefits (bullet format), technical specs, ideal use cases, guarantee statement. Optimize for both human and SEO.

Create 5 Facebook ad variations for [PRODUCT]. Each: primary text (125 chars), headline (40 chars), description (30 chars). Test angles: fear of missing out, social proof, curiosity gap, direct benefit, authority.

Define a brand voice for [COMPANY]. Output: 3 brand personality traits, do's and don'ts, vocabulary guidelines (words we use, words we avoid), example sentences in brand voice.

Create a 12-slide pitch deck outline for [STARTUP]. Slides: Problem, Solution, Market Size, Product Demo, Traction, Business Model, Competition, Team, Financials, Ask. For each slide: key message + suggested visual.

Create a detailed customer avatar for [PRODUCT]. Include: demographics, psychographics, daily routine, goals, frustrations, information sources, buying objections, decision criteria. Be hyper-specific.

Outline a long-form sales page for [PRODUCT]. Sections: headline hook, problem story, solution intro, benefits deep-dive, features list, social proof, pricing, guarantee, FAQ, final CTA. Provide 2 headline options.

■ Developer & Tech

You are a senior software engineer. Here is my code that produces [ERROR]. Analyze it step by step, identify the root cause, and provide the fix with explanation. Code: [PASTE CODE]

Write a [LANGUAGE] function that [DESCRIPTION]. Requirements: handle edge cases, include type hints, docstring with examples, O(n) time complexity. Return only the function code.

Convert this request to a SQL query: "[NATURAL LANGUAGE REQUEST]". Table schema: [SCHEMA]. Include: proper JOINS, indexing considerations, comments explaining each clause. Use PostgreSQL syntax.

Review this code for: correctness, performance issues, security vulnerabilities, readability, and adherence to [LANGUAGE] best practices. Provide specific line references and suggested fixes. Code: [PASTE]

Generate OpenAPI 3.0 documentation for this endpoint. Include: path, method, parameters, request body schema, response schemas (200, 400, 500), example request and response. Code: [CODE OR DESCRIPTION]

Refactor this code to improve: readability, modularity, and performance. Follow SOLID principles. Keep the same functionality. Explain each change you make. Code: [PASTE]

Write comprehensive unit tests for this function using [TEST FRAMEWORK]. Cover: happy path, edge cases, error conditions, boundary values. Use AAA pattern (Arrange, Act, Assert). Code: [PASTE]

Generate a regex pattern that matches [DESCRIPTION]. Provide: the pattern, a breakdown of each component, and 5 test cases showing matches

and non-matches.

Generate a conventional commit message for these changes: [DESCRIBE CHANGES]. Format: type(scope): description. Types: feat, fix, refactor, docs, test, chore. Keep under 72 chars.

Design a system architecture for [PRODUCT/SERVICE]. Cover: high-level diagram description, tech stack choices with rationale, data model, API design, scaling strategy, monitoring approach, tradeoffs made.

Generate a production-ready Dockerfile for a [LANGUAGE] application. Include: multi-stage build, non-root user, health check, proper layer caching, environment variables, entrypoint. Add comments.

Write a GitHub Actions workflow for [USE CASE]. Include: trigger events, environment setup, testing, linting, building, and deployment steps. Use caching for speed. YAML format.

Improve this error message to be user-friendly. The user is a [TECHNICAL/NON-TECHNICAL] person. Include: what went wrong (plain language), why it happened, exact steps to fix it.

Design a CLI tool for [PURPOSE]. Output: command structure, flags/arguments, example usage, error handling strategy, output formats (text/JSON/table), and help text.

■ Data & Analytics

Analyze this dataset and extract 10 actionable insights. For each insight: the finding, the business implication, and a recommended action. Dataset description: [DESCRIPTION]. Format as executive summary.

You are a data analyst presenting to executives. Summarize [DATA/REPORT] in 5 bullet points. Each bullet: one-sentence insight + one-sentence recommendation. No jargon. Focus on business impact.

Describe the best chart type to visualize [DATA RELATIONSHIP]. Explain: chart choice rationale, what the audience should notice, how to label axes, and what a good title would be. Alternatives and when to use them.

Perform statistical analysis on [DATA]. Include: descriptive statistics, normality check, appropriate hypothesis test, effect size, confidence intervals, and interpretation in plain English.

Analyze these A/B test results: [DATA]. Calculate: statistical significance (p-value), confidence intervals, practical significance, required sample size for conclusive result. Provide recommendation.

Design a KPI dashboard for [DEPARTMENT/ROLE]. Include: top-level KPIs (4-6), trend charts, breakdown dimensions, alert thresholds, refresh frequency. Explain why each metric matters.

Describe a customer segmentation approach for [BUSINESS TYPE]. Segments: behavioral, demographic, value-based. For each segment: defining characteristics, size estimate, targeting strategy, messaging angle.

Turn these data points into a compelling narrative: [DATA]. Structure: setup (context), conflict (problem revealed by data), resolution (what we did/changed), result (impact numbers).

Content Creation

Write a 10-minute YouTube video script about [TOPIC]. Structure: hook (first 5 seconds), intro, 3 main points with examples, B-roll suggestions, CTA. Tone: [EDUCATIONAL/ENTERTAINING]. Include timestamp markers.

Write a 10-tweet thread about [TOPIC]. Tweet 1: bold claim/hook. Tweets 2-9: one insight each. Tweet 10: CTA + link. Each tweet under 280 chars. Use line breaks for readability. Add 2 emoji per tweet max.

Write a LinkedIn post about [TOPIC/EXPERIENCE]. Structure: attention-grabbing first line, personal story, lessons learned, actionable takeaway, engagement question. 1200-1800 chars. Professional but authentic tone.

Write a newsletter edition about [TOPIC]. Structure: personal note/setup, 3 curated insights with commentary, 1 tool/resource recommendation, reader question or prompt. Sign off with next edition teaser.

Write a 30-60 second TikTok script about [TOPIC]. Include: hook (first 2 seconds), visual direction, text overlay timing, audio/sound suggestion. One clear message. End with CTA.

Create a detailed blog post outline for "[TITLE]". Include: meta description, target keywords, H2 headings, key points per section, internal/external link suggestions, and a compelling introduction hook.

Take this [ORIGINAL CONTENT] and repurpose it into: 1) Twitter thread, 2) LinkedIn carousel outline, 3) newsletter tip, 4) YouTube Shorts script. Maintain core message, adapt format.

Generate 20 hooks for content about [TOPIC]. Mix: question hooks, stat hooks, controversial opinion hooks, story hooks, how-to hooks. Make them scroll-stopping and curiosity-driven.

Write a case study template and fill it for [PROJECT]. Structure: client background, challenge, solution, implementation, results (quantify!), client quote, key takeaways. 800-1000 words.

Write the text content for an infographic about [TOPIC]. Structure: headline, 5-7 data points/statistics, 3 key takeaways, sources footnote. Keep each data point under 15 words.

■ Design & Creative

Write UX microcopy for [FEATURE/PAGE]. Include: button labels, empty states, error messages, success messages, tooltips, placeholder text. Brand voice: [VOICE]. Be concise, helpful, and human.

Generate 30 name ideas for a [BUSINESS TYPE] that [VALUE PROP]. Categorize: descriptive, evocative, invented, compound. For top 5: explain why it works and check domain availability intuition.

Suggest a color palette for a [BRAND TYPE] targeting [AUDIENCE]. Include: primary (2-3), secondary (2-3), accent (1-2), neutral (3-4). Provide hex codes and explain the psychology of each choice.

Act as a design director reviewing [DESIGN DESCRIPTION]. Evaluate: visual hierarchy, typography, spacing, color usage, accessibility, consistency. Provide 5 specific improvements in priority order.

Brainstorm 10 logo concepts for [COMPANY]. For each: style (wordmark/icon/combination), symbolism, typography direction, color scheme, what it communicates about the brand.

Write a creative brief for [PROJECT]. Include: background, objective, target audience, key message, tone, deliverables, timeline, budget range, success metrics, and competitive references.

■ Productivity & Personal

Help me plan my day. Here's what I need to do: [TASK LIST]. Prioritize using Eisenhower Matrix. Suggest: top 3 MITs (Most Important Tasks), estimated time blocks, and what to delegate or delete.

Create a meeting agenda for [MEETING TYPE] with [ATTENDEES]. Include: objective, time allocation per topic, discussion prompts, decision points, action item capture format. 30-minute meeting.

I need to decide between [OPTION A] and [OPTION B]. Walk me through a structured decision framework: criteria definition, weighting, scoring, sensitivity analysis, final recommendation with confidence level.

Create a 30-day learning plan to master [SKILL]. Daily: 1 concept + 1 practice exercise. Weekly: 1 mini-project. Include: best free resources, milestones, and how to test your knowledge each week.

Help me set personal OKRs for [TIMEFRAME]. 3 Objectives (qualitative goals), each with 2-3 Key Results (measurable outcomes). Include: confidence level, dependencies, and weekly check-in template.

Design a habit-building plan for [HABIT]. Use: habit stacking, environment design, 2-minute rule, commitment device, tracking method. Include how to recover from a missed day.

Guide me through a 90-minute deep work session. Pre-session: clear intention + environment checklist. During: focus prompts at 25/50/75 min marks. Post-session: reflection questions + next session prep.

Write a meeting follow-up email. Structure: thank you, key decisions made, action items with owners and deadlines, next meeting date, open questions. Professional, clear, no fluff.

■ Advanced Prompting Techniques

Solve this problem step-by-step: [PROBLEM]. Think through it like this:
1) Understand the problem, 2) Break it into sub-problems, 3) Solve each,
4) Verify the solution, 5) Present the final answer.

You are a [ROLE] with 20 years of experience. I am your [RELATIONSHIP].
[TASK/CONTEXT]. Provide your expert advice, including: what I'm doing
right, what could go wrong, what you'd do differently.

I'll show you examples of [TASK]. Then give you a new input. Match the
style, format, and quality. Example 1: [INPUT→OUTPUT]. Example 2:
[INPUT→OUTPUT]. Now do: [NEW INPUT]

Format your response as JSON with this exact schema: [SCHEMA]. Do not
include any text outside the JSON output.

[YOUR PROMPT]. After your response, add a "Self-Critique" section where
you identify: 1 potential weakness, 1 missing angle, and how the
response could be improved.

I want to achieve [GOAL]. Ask me clarifying questions one at a time
until you have enough context. Then provide the solution. Don't guess –
ask.

■ ■ Prompt Engineering Cheat Sheet

The 6-Element Formula

- 1. **Role** — "You are a [expert role]"
- 2. **Context** — "I am [situation/background]"
- 3. **Task** — "Your task is to [specific action]"
- 4. **Format** — "Output as [format specification]"
- 5. **Constraints** — "Do not [limitations]"
- 6. **Examples** — "Here's an example: [input → output]"

Technique Selection Guide

Technique	Best For
Zero-shot	Simple, well-defined tasks
Few-shot	Consistent formatting, style matching
Chain-of-thought	Complex reasoning, math, logic
Role-playing	Domain expertise, perspective-taking
Self-critique	Quality improvement, blind spots
Multi-step	Long workflows, collaborative tasks
Reverse prompting	Ambiguous problems, exploration

Common Mistakes

- **Too vague** → ■ Be specific about format and constraints
- **One giant prompt** → ■ Break into logical steps
- **No examples** → ■ Show what "good" looks like
- **Ignoring context** → ■ Explain who you are and what you need
- **Accepting first output** → ■ Iterate: "improve this by..."
